

How Come We Never Hear About These Things? - Guess What! you do!

Welcome! - "The Global Cabin Air Quality Executive (GCAQE), established in 2006, is the leading organization representing air crew (pilots, cabin crew and engineers), that deals specifically with contaminated air issues and cabin air quality. We represent over 20 organizations, almost half a million aviation workers around the world. GCAQE members have been actively involved in working with crews, global experts, scientists, doctors and the aviation industry for many years on this subject, including being members of several international committees such as the FAA OHCRA project, ITF, SAE and ASHRAE committees.

WHO WE ARE - "A global coalition of health and safety advocates committed to raising awareness and finding solutions to poor air quality in aircraft."
